Introduction

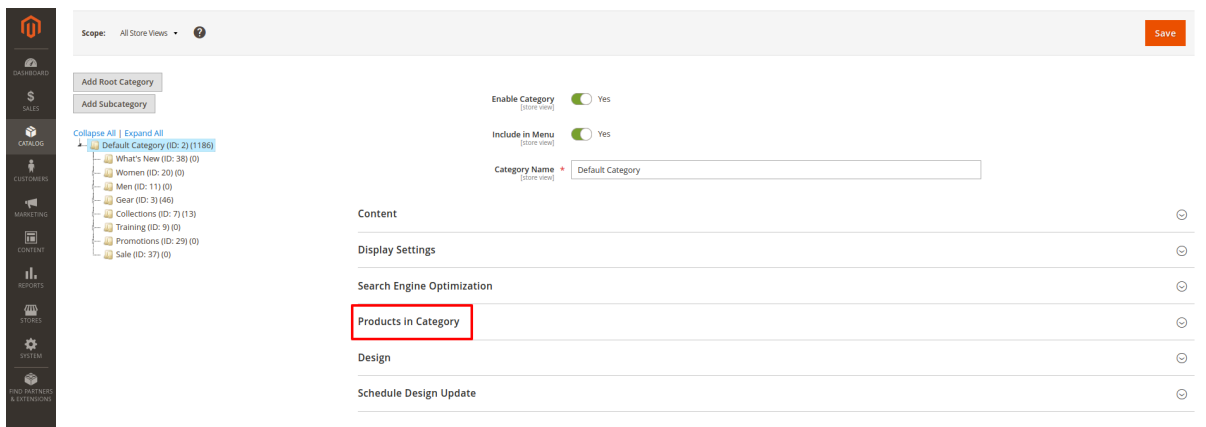

- The “AdminCategoryProductThumbnail” module is a key component for e-commerce administrators, aimed at streamlining the process of managing product categories and their associated images. This module enhances the administrative user experience by providing intuitive tools for organizing and displaying product thumbnails within various categories.

Categories

Category Products

Admin Category Product Thumbnail Extension for Magento2 by Mavenbird

First of all click on Catalog → Categories → Product in Categories. Then Check Thumbnail Images of Product

- Category in Product : -

When you click the "Product in Category" button, you are redirected to a list of multiple products within that category.

When managing products in a category with the “Admin Category Product Thumbnail ” module, you may encounter scenarios where a single category contains multiple products. Clicking on a product within such a category typically leads to a detailed view or edit page specific to that product.

<input checked="" type="checkbox"/>	2035		Erika Running Short-31-Purple	WSH12-31-Purple	Not Visible Individually	Enabled	\$45.00	-1176	Edit

Thumbnail Integration:

Simplifies the process of adding and updating product thumbnails, allowing admins to easily associate relevant images with each product to improve visual appeal and user understanding.

Enhanced Product Visibility:

Ensures that each product's thumbnail accurately represents its features, making it easier for users to identify and engage with products within the admin interface.

Efficient Management Tools:

Provides intuitive tools for cropping, resizing, and optimizing thumbnails, helping maintain consistent and high-quality visuals across different categories and devices.
